

The ACE Mentor Program of Central Florida is excited as we celebrate the end of our first year of mentoring students in the fields of Architecture, Engineering, and Construction. Our first team of students was from Lyman High School in Seminole County. The culmination of this year's program was a bridge building competition (see picture) and prizes were given for the strongest structure. Both parents and students raved about the program. When asked if they were going to pursue study in these disciplines, there were a lot more hands that rose now than at the beginning of the year! This program truly works! It was fun for both the students and the mentors. A big thank you goes to Andrew Masters of Hensel Phelps, who was our team leader.

With a new school year fast approaching, we **need** mentors to fill two teams. One team will be with **Lyman High School** and the other team with **University High School** in Orange County. The time requirement is minimal - every other week at the most, from October through April - see the attached schedule.

We need the following volunteers:

Architects, Engineers (electrical, mechanical, civil, structural, geotechnical), Landscape Architects, General Contractors, Major Subcontractors, Suppliers, Developer/Owners.

Make a difference in a student's life...introduce them to your discipline! If you are interested, please contact one of the board members listed below and we will pass your information on to the two team leaders. Thanks in advance for your support!
