11	May 15	May 17
Final Presentations	May 24	

Meetings are 4:00 – 6:00 pm.

How do things get built?

If you're interested in the building professions,
ACE Mentor Program of Oregon
can open the door.

ACE Mentor Program nationally has helped over 60,000 students get their first taste of the building professions. From architecture and design to engineering (of all kinds) to construction management, there are a dozen professions that need to interact to get just one building built. Maybe one of them is right for you!

This year will be ACE's sixth year in Portland. You'll work with students from your own school and from schools all over the area on a project team, creating your very own design. Professionals in the ACE fields will teach you how it all works as your project matures, and at the end you'll "pitch" your project to an audience of family, teachers and professionals. Scholarships are awarded each May at the final program.

Sound good? What you need to know to get started

is right over there.
