

John V. Magliano, P.E.
Chairman and CEO, Syska Hennessy Group

John Magliano is Chairman and Chief Executive Officer of Syska Hennessy Group, one of the leading consulting engineering, technology and construction firms in the Nation.

John joined the Syska Hennessy Group in 1970 after graduation from Manhattan College with a degree in electrical engineering and a 4-year tour of duty in the US Air Force. During his 36 years with the firm he has served as principal-in-charge of many of the firm's high profile clients and projects including Goldman Sachs, JP Morgan, New York Presbyterian Hospital, the United Nations, US General Services Administration and the U.S. Department of Agriculture.

He is also Syska Hennessy's Chief Engineer, focused on the continual improvement of the technical capabilities of the firm and its people. He heads the firm's Technical Leadership Committee that provides guidance and sets policy for all technical work. In 1981 he established the firm's unique Engineer in Training (EIT) program, an intensive training program for new engineers just out of college designed to immerse them in the firm's engineering techniques.

John is one of the founding members of the ACE Mentor program, a non profit group which provides mentoring for high school students in the field of architecture, construction and engineering. He is Chairman of the ACE Mentor program of New York Board of Directors and is active with the annual Scholarship Luncheon Committee and the guidance of his firm's mentor team. He is also a Director of ACE of America.

He has served on a number of committees for the Town of Eastchester, including the Town Zoning Board of Appeals. He also serves as advisor to the Tuckahoe School District Board of Education and the Preston High School Board of Trustees and is a Trustee of Manhattan College.

A licensed Professional Engineer in 12 states, John is a Director of the American Council of Engineering Companies, a member of the Risk Management Committee and is a member of many technical and professional organizations. He has authored numerous articles in technical journals and has been an adjunct professor at the NYU School of Continuing Education.

Syska Hennessy Group is one of the country's leading consulting, engineering, technology and construction firms specializing in creating and evolving life cycle solutions for mechanical, electrical, sanitary, fire protection and electronic systems in buildings. The firm maintains 14 offices throughout the United States and has contributed to projects in all 50 states and 41 foreign countries. The firm also maintains engineering groups specializing in energy systems, transport systems, energy management, facilities management, voice and data telecommunications, building automation and controls, security systems. The firm's Construction Division provides design management and construction management services for technically complex projects.
