Founded in 2006, the ACE Mentor Program of Greater San Antonio, Inc. consists of building industry professionals and educators who help high school students learn more about potential careers in architecture, engineering, and construction.

During the program, students work in teams under the mentorship of experienced professionals, who guide them through projects that meet real industry requirements. The result is an opportunity to gain practical insight into what building industry professionals do to transform their ideas from an initial concept into a finished building.

In addition, qualified students can apply for local scholarships to summer camps or college/university study in the fields of architecture, construction, or engineering.

SEE THE FUTURE OF ARCHITECTURE, CONSTRUCTION & ENGINEERING

Student teams from 12 San Antonio high schools will provide a 10-minute presentation showcasing their conceptual design/build projects to a panel of local building industry experts for feedback. Interact with students during the 6:15-6:45 pm Open House as they display concept boards and/or models.
