Annapolis

June 2014

ACE Annapolis Award Scholarships

ACE Annapolis extends a big thank you to the many business leaders, education leaders and community leaders who generously contributed to over \$15,000 during this year's fundraising event. This overwhelming support is a clear endorsement of ACE Annapolis' goal to build future professionals in the areas of Architecture, Construction and Engineering and allows for an expanded program that will reach twice the number of high schools in the 2014-2015 school year.

The ACE Annapolis Reception and Networking Event held on May 14, 2014 at the International Masonry Institute's Brice House in Historic Downtown Annapolis celebrated its largest level of fundraising to date. Guest speaker, Dr. Joe Thomas, USNA Professor of Leadership Education and retired Marine Lieutenant Colonel, gave motivating commentary on the importance of mentor programs such as ACE and the value these programs have in our communities and to our industry. Two South River High School students, who will be entering engineering programs in the fall, were awarded scholarships. We congratulate Jonathan Malone and Brian Goncalves and wish them well in their college programs.

Student Spotlight

Jon Malone : "The ACE program is a magnificent program that has helped me define what I want to do with life, by showing what the ACE fields consist of through direct contact with exceptional, knowledgeable professionals. After two years of ACE, I am confident to say their help has put me leaps and bounds above my competition, while having reams of fun." Jon has been hired as a full time employee for Absolute Fire Protection. Dan Mathias, ACE Annapolis Mentor, is the co-owner of the company and was an involved mentor this past year.

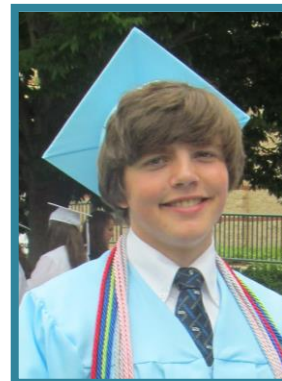

Brian Goncalves : "ACE has been an amazing experience that has allowed me to become friends with and also learn from many professionals in the program's fields."

CONGRATULATIONS!

Jonathan Malone – West Virginia University,
Civil Engineering - \$2,000 Scholarship Award

Brian Goncalves – University of Maryland,
Engineering - \$2,000 Scholarship Award

ACE Mentor News

Student Presentations

On May 6, 2014 each of the teams gathered at the South River High School Library for a final presentation night. The students presented their designs to other teams, their families, teachers, prospective mentors and the affiliate administrators.

SRHS Students Brian Goncalves, Jonathan Malone, Derek Geiszler, Andrei Kuriatnikov

AHS Students Chavella Bell & Johanna Guardado
