Florida PE, Georgia PE

Professional Affiliations:

Institute of Transportation Engineers
American Society of Highway Engineers
International Municipal Signal Association.

How long have you been a mentor? 8

Who or what inspired you to join ACE as a mentor?

A Client suggested that I become involved in working with prospective high school students interested in Engineering.

What have you found to be most rewarding about being a mentor?

I love it when current and graduates of the ACE program ask for a reference for college or an internship. It is rewarding to know that they are staying in and succeeding in the ACE related fields.

What is the most surprising thing(s) you've learned from being a mentor?

I am always surprised by the Student's presentations at the end of year event. The students work diligently throughout the year, but it all seems to come together at the end. The presentations are always impressive.
