

## 2020 CMiC-Allen Berg Memorial Scholarship National Results

Twenty-three (23) students from 16 states have won CMiC-Allen Berg Memorial Scholarships, worth between \$5,000 and \$40,000. A little over \$400,000 was awarded.

Forty-eight (48) ACE affiliates nominated a student for the scholarship. Applications were reviewed first by a team composed of ACE Board members. The final selection and financial determination were made by a team of ACE Executive Committee members and given to CMiC and the Allen-Berg Family for acceptance.

Selected based on merit and financial need, scholarship winners this fall will enter accredited college programs in architecture, interior design and several engineering fields, including civil, mechanical, electrical, and architectural.

The winners were notified via Zoom calls with their affiliate leaders and team mentors.
