- The ACE Mentor Program is an after-school program geared toward all high school students.
- Our mission is to **engage, excite, and enlighten** high school students to pursue careers in architecture, engineering, and construction through mentoring and continued support for their advancement into the industry.
- Students **attend weekly sessions** with professional mentors where they learn about structural engineering, mechanical engineering, architecture, landscape architecture, and the various trades.
- This year’s project will be an **expansion of Concourse C at the Denver International Airport**. Students will work in teams to develop a design for the expansion which they will present to a group of professionals at the end of the 16 weeks.
- Students will **tour the airport** and get a behind-the-scenes look at airport construction!
- Seniors who complete the presentation are **eligible for scholarships**.
- Juniors and seniors are eligible for a **summer experience** where students get to shadow professionals in the industry and are **paid for 80 hours of work**.

Sessions run from January 2023 through April 2023. Scan QR Code to register:
