The ACE Mentor Program of Idaho is an after school program that connects Boise area high school students to the Architecture, Engineering, and Construction industry through education, career opportunities, and connections to folks in the industry. *We are currently recruiting professionals in AEC fields to be ACE Mentors to volunteer and coach students in a hands-on, team-oriented project.*

The program has demonstrated success helping students make informed career decisions, provide exposure to the industry, and provide connections to professionals in their local area.

To learn more about ACE, visit www.ACEMENTOR.org.
